

About MJCOE

Michael Job Memorial College of Education for Women (MJCOE) was established in the year 2004-05 approved by NCTE, affiliated to Tamil Nadu Teachers Education University and accredited by NAAC with 'B' grade.

MJCOE is a reputed institution offering B.Ed & M.Ed programmes. It is one of the best colleges of education in the district and one among the two that is providing M.Ed course.

MJCOE has come up with a commitment to revive the standards in teaching, by producing well-trained teachers, significant to the present situation. The college offers an excellent arena for the teachers to get skilled professionally and to uphold the ethical and moral values of this noble profession. Our students get trained to create new ways of teaching with the support of modern educational technology tools like Learning Management Systems, Smart Boards and Learning Apps. We have established an E-Lab to familiarise the students with modern teaching aids like electronic white board and interactive learning content. This provides opportunities for the teaching and learning process beyond the physical limits of the traditional classroom walls.

In order to augment the vision of the institution "**Empowering the Girl Children**", the college provides the cutting edge technologies in the classroom teaching and enabling our students to be ready for job, when they complete the course. Highly qualified and professionally experienced teachers of our institution are the main source for creating such empowered women.

Training and Placement are the two integral parts of a high-quality academic course curriculum. MJCOE provides its student teachers the best in life, with placement centre functioning in the campus under the proficient administration of our Principal and experienced faculty members.

Apart from the teaching practice in reputed schools for 80-90 days, we offer Soft Skill Development Programme in the campus. The main aim of the programme is to groom our students to shape up their career goals and to be well placed in the most excellent institutions. Additionally, these skills enable the students to develop a strong work ethic by doing the job effectively and efficiently. It also makes them stay focused, organized,

competitive, dedicated, have a positive attitude and leadership skills. Consequently, our students are different from others and giving a competitive edge over others in the workplace as well as in life.

Special counselling and directions are also given to them, which helps to groom up their personality and be confident psychologically to meet the reality of life and outshine in the field of education. The Institution helps each student in exploring placement opportunities by inviting various Matriculation, CBSE and International Schools for campus recruitment and allowing the student teachers to make healthier decisions about future career choices.

MJC Centre for Research: with the intention of enhancing research opportunities, academic excellence, real-world problem solving, and knowledge creation and dissemination, MJC Centre for Research is created. This also provides effective interaction between the faculty members, scholars and the industry to be in touch with cutting edge technologies in the educational research field. This centre is affiliated by **Tamil Nadu Teachers Education University**.

With the advent of e-learning and continuous skill-gaps in leading industries, Michael Job Center for Lifelong Learning & Extension (MJCLLE) has come up with a commitment to revive the notion that learning new skills and enhancing the existing skills augment an individual to blend with an endless stream of knowledge. As the employment world now bids for skills rather than titles, the need for reskilling and upskilling becomes inevitable. So, MJCLLE launches 7 new courses and offers an excellent arena for people who aspire to get skilled professionally in job markets.

Courses Offered:

1. Advanced Diploma in Montessori and Primary Education (1 Year)
2. Certificate Program in Communication skills and English Language (2 Months)
3. Certificate Program in Classroom Teaching Instructional Strategies (2 Months)
